Visible Light Solar Technologies Expands Distributor Roster Globally

Extensive Network of Lighting and Electrical Experts Extends Reach throughout US, Canada, Asia

ALBUQUERQUE, New Mexico. February 2, 2010 — Visible Light Solar Technologies today announced the addition of nine distributors to its already extensive roster of partners, giving the LED lighting company a team of experts located in cities across North America and into key Asia markets.

The expanded global network of experts will help customers evaluate their existing energy intensive installed base of lighting fixtures and install new, or retrofit the existing fixtures, with Visible Light Solar's LED on-and-off-grid energy optimization solutions. By combining LED lighting components, a smart interface and the option of including solar panels or using solar exclusively, Visible Light Solar gives customers a wide range of energy savings solutions.

Visible Light Solar is the first commercial and industrial lighting company to integrate LED lighting devices with on-and-off-grid energy optimization and solar power technology. The company's LED lighting applications operate 50-85% more efficiently than their traditional HID and incandescent counterparts. In addition to dramatically lowering energy consumption, Visible Light Solar's solutions also reduce maintenance costs (high quality LED fixtures have a 50,000 hour-rated lifespan and are resistant to thermal and vibrational shocks) and produce true-color, programmable illumination.

Visible Light Solar's new authorized distributors include:

Access Light Solutions LLC, based in Dallas, TX, provides reliable energy solutions for its customers. The company specializes in LED commercial and industrial lighting solutions that reduce kilowatt consumption and maintenance costs while producing highly programmable, color-accurate illumination.

Double "R" Electric specializes in electrical service and maintenance of big-box retail outlets and also has new construction with public schools and commercial facilities. Double "R" Electric operates in two dozen states and is equipped to handle electrical projects of all sizes. <http://doublerelectric.net/>

Electrical Products Company has been in the sign and lighting business since the 1930s. Located in Albuquerque, NM, EPC sells products throughout the U.S. and Canada. It specializes

in retail sales to end users and generally installs its own products with a fleet of crane and ladder trucks.
